

## EXAMPLES OF FLEXIBILIZATION

## SERVICE AND ACCESSORIES

### Services:

- Flexible solutions
- Assembly of the container covers
- Short-notice replacement deliveries for your container covers, including for products of other manufacturers
- Service work, including for third-party products
- Gas camera / CH<sub>4</sub> measurement / inspection / repairs
- Moving of sealing sheets
- Our technicians work according to §19 I, WHG with plastic welding certification according to DVS regulations
- TÜV certified

### Other offers:

- Sealing sheets for leak detection systems, DIBT
- Non-wovens and geo-textiles
- Plastic sealing sheets made of LD-PE / HD-PE / PVC / PP / EPDM

## FOILS AND COMPONENTS FOR BIO GAS SYSTEMS:

- Double membrane gas storage solutions
- Single membrane tension covers
- Extern foiled gas reservoirs
- Lagoons
- Service and accessories

**Baur Folien GmbH**

**DOUBLE MEMBRANE GAS STORAGE**

**Double membrane gas storage is the state of the art in biogas storage.** This effective system is extremely robust and heavy duty.

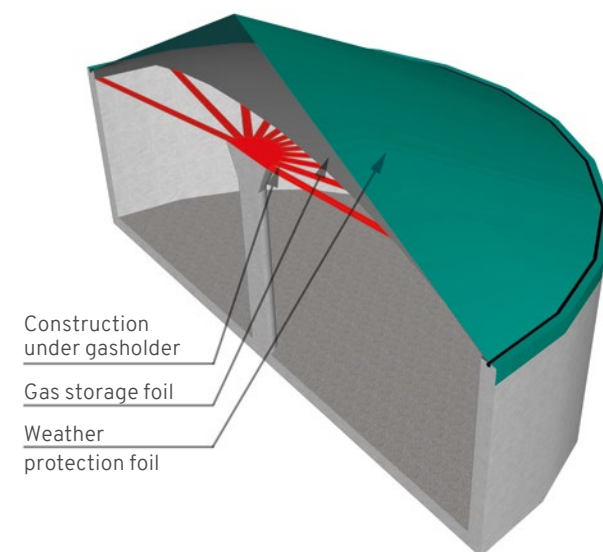

The weather protection foil keeps the wind and rain away from the integrated gas storage foil. This protects the gas storage system and ensures a long service life. Thanks to the use of modern welding equipment, you receive reliable, tight weld seams. We supply the weather protection foil in all standard colours plus other colours of your choice on request!

You can choose the form of the roof structure. We offer the tapered shape and the capped ball shape. For fastening, we utilize various methods, such as a stainless steel U section with clamping hose, or alternatively a stainless steel flat section. The storage system can be mounted to new or existing containers as well as on concrete slabs or foundations. If needed, we can manufacturer the storage system in various shapes (round, cornered, oval) or adapt it to your desired volume.

**On request, we can deliver and install our covers anywhere in the world!**

**Accessories:**

- Over-/under-pressure valve
- Stainless steel center post
- Digital imprint of YOUR company logo on the weather protection foil

**SINGLE MEMBRANE TENSION COVERS**

**Single membrane tension covers without gas storage systems have become an essential part of emissions protection.** We manufacturer perfectly fitting emissions protection covers precisely according to your needs – even for large containers. The inspection and service openings can also be offered in extra-large sizes.

**EXTERN FOILED GAS RESERVOIRS**

The simplest and least complicated solution for external or unpressurized gas storage. You can obtain foiled gas reservoirs in all sizes and shapes, e.g. as cushion, cylinder or quad storage. The foiled gas reservoirs are manufactured precisely to the dimensions you need, with various sizes and types of connections.

The high-quality, long-lasting membrane material guarantees maximum robustness. The use of state of the art manufacturing systems ensures high processing quality.

**LAGOONS**

- Coverage for lagoons
- Custom tailored
- On site installation
